DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-4, drawn to a laminate sheet, classified in class 428, subclass 40.1.
 - II. Claims 5-6, drawn to a producing method for a laminate sheet, classified in class 156, subclass 247.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made a materially different process such as co-extruding the release sheet, the adhesive layer and the base material together, instead of laminating them in the sequential order.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with David Posz on December 8, 2004 a provisional election was made without traverse to prosecute the invention of Group I,

Application/Control Number: 10/619,511

Art Unit: 1772

claims 1-4. Affirmation of this election must be made by applicant in replying to this Office action. Claims 5-6 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Page 3

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Autterson (5827589).

Autterson relates to a laminate sheet (fugire-8) comprising a long release sheet (30), an adhesive layer (26) formed on the release surface of the release sheet, a base material (42) formed on the adhesive layer, and a protective material (32) provided on a portion of the base material, wherein the portion corresponds to a portion other than a principally used portion of the adhesive layer.

7. Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by Rasmussen (59318000.

Rasmussen relates to a laminate sheet (figure-2) comprising a long release sheet (16), an adhesive layer (32) formed on the release sheet, a base material (24) formed on the

Application/Control Number: 10/619,511

Art Unit: 1772

adhesive layer, and a protective materially (66) provided on a back surface of the release sheet, wherein the portion corresponds to a portion other than the principally used portion of the adhesive layer.

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Autterson.

Autterson, as discussed above fails to teach the presence of protective material on both sides of a central portion. It would have been obvious to one having ordinary skill in the art at the invention was made to modify Autterson by providing protective materials on both sides of the central portion to impart reinforcement to both the sides, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

10. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rasmussen.

Rasmussen, as discussed above, fails to teach the presence of protective material on both sides of a central portion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Rasmussen by providing protective materials on both sides of the central portion to impart reinforcement to both sides,

Art Unit: 1772

since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. St. Regis Paper Co. v. Bemis Co., 193 USPQ 8.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is 571-272-1487. The examiner can normally be reached on 7:30 AM to 5:00 PM, and on alternate Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Harold Pyon can be reached on 571-272-1498. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
